### MAIL CARRIERS WOULD DELIVER ANTHRAX DRUGS

By Derek Kravitz  
WashingtonPost.com  
October 1, 2008

"The federal government said today that in the event of an anthrax attack it would use postal carriers to deliver emergency antibiotics to households across the country.

The project, announced today by Health and Human Services Secretary Michael Leavitt, will begin with a \$500,000 pilot training program in Minneapolis-St. Paul. If all goes well, the program would be expanded to other cities starting next year."

"Test runs in Seattle, Philadelphia and Boston over the past two years worked well, health officials said. Letter carriers, escorted by police officers, delivered empty pill bottles along with a flier explaining what was happening. In Philadelphia, 50 carriers reached roughly 53,000 households in eight hours, The Associated Press reports.

To gather volunteers to hand out the antibiotic doxycycline, the federal government offered to fully stock the homes of letter carriers with enough of the drug for their families in case of an outbreak."

## **CONTRACT AWARD - ADVANCED DEVELOPMENT OF MULTIVALENT FILOVIRUS (EBOLA AND MARBURG) HEMORRHAGIC FEVER VACCINES**

FedBizOpps.com

September 30, 2008

“This project will be funded in whole or in part with Federal funds from the Biomedical Advanced Research and Development Authority (BARDA), DHHS, in conjunction with the NIAID, NIH. The NIAID, Division of Microbiology and Infectious Diseases (DMID) has a requirement for the development of a prophylactic multivalent filovirus vaccine that is capable of protecting against both Ebola and Marburg viruses, utilizing platform technology such that the same basic development and manufacturing process is used to develop each component of the final multivalent vaccine. NOTE 1: This solicitation will NOT support the development of devices for the delivery of vaccines; the development of therapeutic agents and therapeutic vaccines; the development of new animal models or refinement of existing animal models; the design and conduct of Phase 3 clinical trials; nor the development of any adjuvants which are not currently used in FDA-licensed vaccines.”

“Additional contract awarded from this BAA (see separate award notice): HHSN272200800055C - Integrated BioTherapeutics, Inc. Additional contract awarded from this BAA (see separate award notice): HHSN272200800056C - Crucell Holland”

## **BIOTHRIX TO INCREASE SUPPLY OF ANTHRAX VACCINE TO NATIONAL STOCKPILE IN CONTRACT WORTH AT LEAST \$364M**

Genetic Engineering & Biotechnology News

October 1, 2008

"Emergent BioSolutions with supply an additional 14.5 million doses of BioThrax®, its anthrax vaccine, to the HHS for inclusion in the strategic national stockpile (SNS). The multiyear contract is valued at between \$364 million and \$404 million. The higher amount is linked to the delivery of product having four-year expiry date.

First deliveries of BioThrax under this new contract are scheduled to begin in the third quarter of 2009. It will follow the completion of deliveries under the company's current \$448 million contract to supply 18.75 million doses of BioThrax to the SNS. Final product deliveries under this new contract are anticipated in the third quarter of 2011."
